DHANSHRI BRIGHT STEELS

ABOUT US

Incorporated within the year 2009, at Pune (Maharashtra, India), we, “Dhanshri Bright Steels,” are noted because the renowned Manufacturer and Supplier of a comprehensive assortment of Bright Bar, steel plate, alloy steel, carbon steel, Structural Angle Channel, Case Hardening, Non-Ferrous Bar. The whole product range includes stainless steel Bright Bar, Round Bar, Square Bar, Rectangular Flat Bar, HR Plate, CR Plate, Aluminum Non-Ferrous Bar, etc.

At Dhanshri Bright Steel, we believe in producing high-quality products with skillful execution and honest efforts. The whole production process is strictly monitored by our skilled quality controllers who have knowledge within the domain. With the support of a complicated in-house testing unit, our entire product range is inspected on defined parameters of quality to eradicate any flaws.

WHY US

We are the wholesaler of, high-quality Bright Bars, steel plate, alloy steel, carbon steel, Structural Angle Channel, Case Hardening, and Non-Ferrous Bar.

Some of the reasons that give us an edge over the others in the industry:

- Use of quality raw materials
- Expert team of professionals
- Competitive cost
- Large production capacity
- Consistent quality
- Ethical policies
- Easy payment modes
- Time-bound deliveries

INFRASTRUCTURE

We have invested an excellent amount of cash within the construction of our vast infra structural facilities that are equipped with all the specified machinery and latest technology. Dhanshri Bright Steels is segregated into many departments like designing, manufacturing, R&D, quality testing, etc. These units are well-equipped with sophisticated machines and highly functional tools & instruments, which helps us during achieving our business goals in a methodical and systematic manner. All departments are manned by our experienced professionals, who have immense knowledge in their concerned fields of operation.

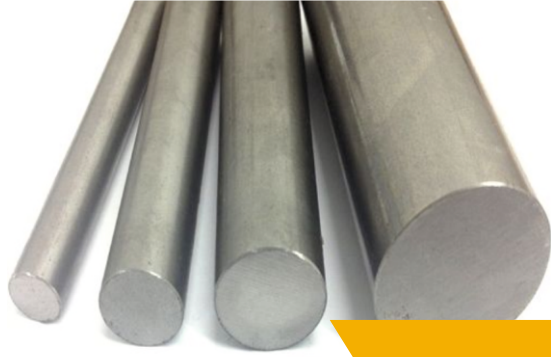

MS BRIGHT ROUND, FLAT, SQUARE & HEX BAR

The term mild steel applies to all or any Mild steel that doesn't contain any alloying elements in its makeup and has a carbon content that doesn't exceed 0.25%. The term "Mild" is used to hide a large range of specifications and forms for a variety of Steel. Mild steel is used in mechanical engineering applications for parts which will not be subject to high stress.

EN 8 BLACK FLAT & SQUARE BAR

En8 is an unalloyed medium carbon steel (BS 970 080m40) has high strength levels compared to normal bright mild steel, because of thermo mechanical rolling. EN8 is suitable for all-around engineering purposes which will require a Steel of greater strength.

EN 1A BRIGHT ROUND & HEX BAR

EN1A (also referred to as BS 970 230M07) is bright low-carbon steel noted for its low carbon content. This Steel is particularly good for free of charge cutting, where an outsized volume of products is required. It is often formed by rolling or drawing and therefore the machining of EN1A is ok for both automatic and CNC machines.

20MnCr5 BLACK FLAT & SQUARE BAR

We are manufacturers of 20MnCr5 steels in India and frequently make in round form. We also manufacture 20MnCr5 in cold-drawn bright bar. It is utilized in boxes, piston bolts, spindles, camshafts, gears, shafts, and other mechanical controlling parts.
